Dear Friends

Last year, the Health Care Center for the Homeless (HCCH) provided care for over 8,500 patients at our clinic, the Orange Blossom Family Health Center. Over 4,300 were homeless, representing half of the total number of homeless individuals living in Orange, Osceola, and Seminole counties.

The number of homeless individuals continues to grow and more people are finding themselves without access to adequate health care. Trends largely responsible for the rise in these numbers include a shortage of affordable rental housing, an increase in poverty, rising health costs, and the current economic situation in our country. These issues present challenges to our health care delivery system.

For over 15 years, HCCH has been meeting these challenges and has always been seen as a bridge to health for the homeless and medically indigent. I am proud to say I have been involved with HCCH for over five years. As we have grown, so have the many health care challenges and their associated service needs.

HCCH is poised and ready to meet these challenges. The expansion of our clinic building in 2008 allowed for the growth of our medical and behavioral health programs. This synthesis of health care disciplines employs a holistic approach, healing both the mind and the body.

Our first mobile medical unit, which launched in May of 2008, is bringing health care into the community and reaching the homeless who cannot access our services due to distance, lack of transportation, or other obstacles. We are very proud to have launched a second mobile medical unit earlier this year, through a generous gift from Senior Resource Alliance and Florida Hospital.

In our daily work, we are reminded that the face of homelessness is changing and that many are just a paycheck or an illness away from being homeless. It’s a tough reality, but as we know there are individuals and families without a place to live, food to eat, and adequate health care.

In 2008, HCCH provided over 26,000 medical, dental, and behavioral health encounters. We provided on-site screening mammograms for over 150 women. We delivered pediatric services at our clinic site and to children living in area shelters. Our HOPE Team completed over 3,200 encounters with individuals and families living on the streets and in the woods.

Thanks to your support, HCCH can continue to thrive and meet the growing needs of the homeless and medically indigent men, women and children in the tri-county area.

Sincerely,

Rick Schooler, FACHE
Board Chair

Facts About the Homeless and the Uninsured

• Every day, there are over 60,000 homeless men, women, and children in Florida.

• There are more than 8,800 homeless individuals living in Orange, Osceola, and Seminole Counties.

• There are only 2,500 shelter beds in the tri-county area, including emergency and transitional beds for families and individuals.

• 20% of the homeless men and women in Central Florida are veterans – 89% received an honorable discharge from the military.

• While homeless people are far more likely to have health problems than the general public, they are 40% less likely to be registered with a doctor or clinic.

• The fastest growing homeless population is a sheltered family consisting of a mother with two or three children. Approximately half of these children are under the age of six.

• One in five homeless women becomes homeless to escape domestic violence.

• The #1 economic reason for homelessness is a catastrophic illness.

• It is estimated there are over 200,000 residents in Orange, Osceola, and Seminole counties who lack medical insurance coverage.
**Man With a Mission**

Dr. Cliff E. Morris, Jr. is a Florida native from Ft. Myers and is a double alumnus of Florida Agricultural and Mechanical University (FAMU) in Tallahassee. He moved to Orlando in 1975 to accept a teaching position at Valencia Community College West Campus. He has a great love for mathematics and retired in 2005 after 30 years as a professor at Valencia, eventually becoming the Dean of Mathematics. Dr. Morris serves as a Senior Bishop at his church, El Bethel Temple of Jesus, an HCCH supporter. He has participated in many annual mission trips with Volunteer Optometric Services to Humanity (VOSH) to areas including Peru, Romania, Ethiopia, and Brazil. He is also involved with a more personal mission in Cape Town, South Africa with Volunteer Educational Support 4 Africa.

Dr. Morris has been involved with the Health Care Center for the Homeless (HCCH) since 1998. He was introduced to HCCH by a Valencia colleague and accepted a seat on the Board that same year. He currently serves as Board Vice-Chair. In addition to his Board involvement, Dr. Morris is also a volunteer with our HOPE Team, spending two or three days a week helping to provide outreach to the population of Central Florida’s numerous homeless camps. As a volunteer, Dr. Morris is able to fulfill his desire to be on the front lines and to help connect people in need with our services. Like his mission trips around the world, he sees this as a chance to show concern and love for people you don’t know without expecting anything in return.

Dr. Morris began and has maintained his involvement with HCCH because he sees it as an investment in America. He has formed friendships with many clients and has seen them triumph over crisis and eventually transition out of homelessness. He wants people to know that HCCH strives to move people from homelessness to living a life of self-sufficiency. At the Health Care Center for the Homeless, we believe that affordable health care should be available to everyone and provided in an atmosphere of dignity and respect. Please remember us as we strive to “provide quality health care services that improve the lives of the homeless and medically indigent people in our community.”

Thank you for your continued support.
To your health,

Bakari F. Burns, MPH, MBA
Chief Executive Officer

---

**Dear Friends**

With the current economic climate, we hear so many terrible accounts of how people are losing jobs and homes. I want to tell you a story with a happy ending.

Yolanda, a college graduate, worked hard to raise her two children and maintain her home. She could not afford health insurance and had not seen a doctor for many years. After her children were grown and on their own, Yolanda became the victim of a man who physically and emotionally abused her for years. In 2005, she escaped from domestic violence only to lose everything...she became homeless and lived in her truck on the streets of Orlando.

Yolanda cried constantly and rarely spoke to anyone as she became more and more depressed. She avoided contact with her family and attempted suicide three times. In 2006, she saw a report on TV about our new clinic and came here for help. Her provider, Dr. Olga Molina, discovered Yolanda was diabetic and suffered from high blood pressure, elevated cholesterol levels, and liver damage. Without medical assistance, she would have died.

As her medical issues were addressed, she was introduced to our behavioral health department and our HOPE Team for additional services. She opened up about the emotional trauma she had endured and began to heal her mind as well as her body. Initially turned down for disability benefits, she recently began receiving SSDI, including retroactive compensation.

Yolanda is currently staying with her son and soon they will be looking for a two bedroom apartment to share. She is visibly happier and has a very optimistic outlook on life. In her words, “I am alive because of this clinic.”

The care and services Yolanda received is an example of how HCCH strives to move people from homelessness to living a life of self-sufficiency. At the Health Care Center for the Homeless, we believe that affordable health care should be available to everyone and provided in an atmosphere of dignity and respect. Please remember us as we strive to “provide quality health care services that improve the lives of the homeless and medically indigent people in our community.”

Thank you for your continued support.

To your health,

Bakari F. Burns, MPH, MBA
Chief Executive Officer
HCCH Future Plans and Updates

Orlando Magic Youth Fund: For the second year in a row, the Health Care Center for the Homeless (HCCH) was a recipient of a grant from the Orlando Magic Youth Fund (OMYF), a fund of the McCormick Tribune Foundation. The OMYF is dedicated to helping children in Central Florida reach their full potential, especially those at risk. They accomplish their goal by supporting organizations that empower families and change lives. For calendar year 2009, HCCH received $20,000 in support of the pediatric program at our clinic, the Orange Blossom Family Health Center. Since 1997, HCCH has received $165,000 from OMYF. We are immensely grateful for the support that we receive from the Orlando Magic Youth Fund.

Phase III Expansion: The Health Care Center for the Homeless (HCCH) is applying for funds through the Community Development Block Grant (CDBG) to expand our dental clinic capacity. We currently have six dental operators and the expansion would increase that number to 10 operators, allowing us to keep up with the growing demand for services. The current administrative suite is already plumbed for dental, providing for easy expansion into the existing offices. The clinic building would be expanded out from the back to accommodate a new administrative suite.

Donor Edge: The Health Care Center for the Homeless (HCCH) has been invited to take part in a new program being sponsored by the Community Foundation of Central Florida (CFCF). The CFCF invited multiple organizations, based on their community standing and unique mission, to participate in a searchable database called Donor Edge. The Donor Edge web-site will provide potential donors with information about different non-profit organizations, enabling them to make educated decisions regarding involvement and financial support. The information compiled on the web-site will include organizational structure, history, impact, program information, audited financial reports, management, and Board member listings. The goal is for the website to eventually have over 500 non-profit organizations available for review by philanthropic individuals. The web-site will also provide donors with the ability to contribute online using a credit card and should be available for use in June of 2009.

For more information, please contact Terri Betts, Development Associate, at (407) 428-5751 Ext 326 or at tbetts@hcch.org.

Santa Claus

Robert Leland Anderson spent many years playing Santa Claus for hundreds of children and adults, until an accident in 1990 left him with a compressed fracture of his spine. Despite attempts at employment, his injuries prevented him from physically being able to work and he eventually became homeless. He spent over ten years living in the woods and finding food in dumpsters.

In May of 2008, Mr. Anderson was evaluated on our HOPE Mobile Medical Unit through Project Homeless Connect. Todd Rock, MPAS, PA-C, discovered that Mr. Anderson suffered from numerous significant medical issues that hadn’t been addressed for years and were subsequently quite advanced. These issues included hypertension, uncontrolled diabetes mellitus, elevated lipids and triglycerides, chronic bronchitis, and diabetic neuropathy. He was transported immediately to our clinic by Nancy Martinez, our HOPE Team Lead.

Mr. Anderson received a treatment plan, but his homelessness prevented him from always eating and grooming properly, sleeping well, and receiving his medicine on a regular basis. He was in need of multiple medications, especially insulin, which he received through the aid of Ida Rodriguez, our Patient Assistance Program coordinator. Todd took it upon himself to take insulin to Mr. Anderson on a Friday evening after work and the HOPE Team provided transportation to the clinic and delivery of insulin on several occasions.

Mr. Anderson was introduced to our Case Manager, Marta Castillo Velazquez, in October 2008. Marta filed paperwork for food stamps and Access Lynx and within a month both benefits were granted. Marta also started collecting paperwork for proof of Mr. Anderson’s disabling conditions and was granted a hearing date for December 2008. In January of 2009, his benefits were granted.

We were able to build a trust with Mr. Anderson through the efforts of team members throughout the organization; he refers to Marta, Ida, and Nancy as his “angels” and will sing Todd’s praises to anyone he can. By connecting with HCCH, Mr. Anderson was able to receive medical treatment, medications and supplies, food stamps, transportation access, medical insurance, and social security disability benefits.

After over 17 years of homelessness, Mr. Anderson now lives every day eating healthier and sticking to his medical regimen and is moving out of homelessness. He never hesitates to tell us how grateful he is for the services that we were able to provide him. His success is a testament to two of our goals at HCCH to help our clients regain their health and transition out of homelessness.

Mr. Robert Anderson (front row), back row (left to right) Marta Castillo Velazquez, Case Manager; Nancy Martinez, HOPE Team Lead; Ida Rodriguez, Patient Assistance Program Coordinator.
Health Care Center for the Homeless

Our Mission: To provide quality health care services that improve the lives of the homeless and medically indigent people of our community.

History of Our Organization The Health Care Center for the Homeless (HCCH) is a 501(c)(3) founded in 1993 by Dr. Rick Baxley, a volunteer physician who saw the need to provide quality health care services to the homeless population in Orlando. HCCH initially shared a space at the Coalition for the Homeless, providing evening clinic hours one or two nights a week. In 1995, HCCH received a grant from the Robert Wood Johnson Foundation to provide primary health care to the homeless in Orange, Osceola, and Seminole counties. In 2002, HCCH was granted funding from the Health Resources and Services Administration (HRSA), Bureau of Primary Health Care to increase the center's capacity and financially support the provision of primary and preventive health care services for the homeless.

For many years, HCCH operated medical and oral health services out of three separate locations. In 2006, HCCH opened our clinic building, the Orange Blossom Family Health Center in Orlando, and doubled our capacity. HCCH is the sole provider of health care services for the homeless population in the tri-county area, taking a multi-disciplinary approach to delivering quality health care services. This approach merges aggressive street outreach with integrated systems of primary care, oral health, behavioral health and substance abuse counseling, case management, and advocacy.

In 2007, HCCH received a $1.1 million grant from the Health Resources and Services Administration (HRSA), Bureau of Primary Health Care. This funding enabled us to increase our medical capacity and allowed us to create our HOPE Mobile Medical Unit. This 37 foot medical clinic on wheels is equipped with two exam rooms and a waiting area and is staffed by a physician assistant, a behavioral health counselor, and two medical assistants. This mobile unit is targeted at the homeless population in Orange, Osceola, and Seminole counties.

2008 saw the completion of our Phase II construction, adding four new medical exam rooms, medical and behavioral health offices, and a patient education and counseling center. The construction was funded by a Community Development Block Grant (CDBG) from the City of Orlando and private funds. Within the next year, we hope to begin our Phase III construction, focusing on a dental clinic expansion, which will add four additional dental operatories and relocate the administrative suite.

Our Services

Primary Medical Care Primary medical care is provided by a team of physicians, nurse practitioners, physician assistants, registered nurses, medical assistants, and student interns. Our goal is to create a “medical home” for our patients in an effort to prevent the inappropriate use of hospital emergency rooms. HCCH is providing healthier options in the management of chronic diseases. Through the Health Disparities Collaborative, a program designed to reduce disparities in health outcomes for poor, minority, and other underserved people, we use a Chronic Care Model. This is designed to empower the patient to take charge in managing their own health. HCCH also operates an in-house pharmacy and has a full-time Patient Assistance Program (PAP) Coordinator. The PAP program helps patients obtain free medication through various pharmaceutical companies. We were able to double our capacity with the opening of our clinic building, but the demand for our services continues to grow. As we provide primary care, we have an Orange County Referral Specialist who provides patients with referrals for secondary care.

Pediatric Care Poverty and homelessness do not discriminate based on age. The fastest growing homeless population is women with children. Domestic violence often affects innocent children and their health needs may be overlooked. At HCCH, our pediatric program provides services that include well child check-ups and immunizations. Our second mobile medical unit visits a local shelter to provide care for mothers and children. This outreach, along with other services provided at the Orange Blossom Family Health Center, is giving kids a healthier start in life.

Vision Services We offer eye exams and distribute glasses free of charge. Through a partnership with Lions Club International and LensCrafters, we are helping people see better and take care of the precious gift of sight. LensCrafters provides free screenings and glasses for 30 of our patients every Thanksgiving as part of Hometown Days. Our Vision Center is the only source of free optometric services for the homeless in Central Florida. We also screen patients for vision related issues that may result from diabetes and other chronic illnesses.

Dental Services Dental services at HCCH are provided by a team of dentists, hygienists, and dental assistants. Our range of services include emergency dental care, oral screenings, cleanings, restoration work, and referrals for surgery. In some cases, we are able to provide full or partial dentures aided in the process by our volunteer, Sister Jessica. We have also established a pediatric dental program that benefits both children and adults by providing oral health education. We believe good dental care not only gives someone a great smile, but also builds confidence. A nice smile can be essential in gaining employment in Florida’s service driven economy.

Behavioral Health Services Our behavioral health services are provided by two licensed mental health counselors, a licensed clinical social worker, and a psychiatric nurse practitioner. This program is the only one in Orange County furnishing behavioral health services to the homeless. Our team of counselors provides mental health and substance abuse counseling, individual and group therapies, and referrals to detoxification and crisis centers. Our psychiatric nurse practitioner is able to prescribe and manage medication on an on-going basis for our homeless clients with chronic behavioral health issues. Our clinic is also an approved site for graduate level mental health interns and students. Our behavioral health team is empowering our clients to make better choices in gaining control of their lives.
Our outreach team is comprised of staff and volunteers working where the homeless live - on the streets and in the woods. The team provides basic needs such as food and clothing in an effort to build a rapport with clients who have an innate mistrust of people, eventually allowing staff to introduce clients to the services that HCCH can offer them. The team provides transportation for clients living in the woods to the clinic for health care appointments. The HOPE Team also assists homeless clients in obtaining identification cards, birth certificates, transitional housing, and referrals to behavioral health and substance abuse treatment programs. The team has also facilitated reconnecting individuals with their families.

**Mobile Medical Program** Building on the success of our HOPE Team, HCCH launched the HOPE Mobile Medical Unit (MMU) in May of 2008, funded through a Federal grant. Serving the community for almost a year now, this 37 foot unit is equipped with two exam rooms and is staffed by a medical provider, a behavioral health counselor, and two medical assistants. This unit provides medical and behavioral health services for the homeless in the tri-county area, visiting 18 community partner sites each month who also serve the homeless.

In 2009, HCCH launched a second mobile medical unit through the generosity of the Senior Resource Alliance and Florida Hospital. This second unit will allow us to reach even further in the community to connect homeless individuals who are unable to come to our clinic location for medical services they desperately need. This program mirrors the Regional Commission on Homelessness’ approach for addressing the health care needs of homeless in the tri-county area.

**The TB Shelter** HCCH has the only residential facility for the homeless suffering from tuberculosis in the State of Florida. Our 10 bed residential shelter provides on-site supervised therapy for patients diagnosed with infectious tuberculosis. In operation since 1995, the shelter ensures patient safety and limits their contact with the community as a whole. Full recovery usually requires an average stay of six months and patients are monitored for their response to treatment. Twelve patients were served by this program in 2008, for a total of 1,272 bed nights. Patients are monitored for social and nutritional needs and are supplied with food partially funded by local churches.

**Case Management** 2008 saw the implementation of a case management program at HCCH. Our case manager helps our clients access mainstream benefits such as SSI, SSDI, food stamps, Medicaid, and unemployment. Program and shelter referrals are also provided. Many of our clients had not been able to access these programs on their own.

**Emergency Room Diversion Program** The Health Care Center for the Homeless (HCCH) has a Health Navigator in the emergency room at Orlando Health. Many within the homeless population use the emergency room as their primary medical care provider. To reduce this improper use, the Health Navigator routes homeless individuals to our clinic, the Orange Blossom Family Health Center. Here, they can receive consistent medical care and are provided a “medical home.” Of the patients that kept their ER follow up appointments at the Orange Blossom Family Health Center, 68% did not return to the emergency room.

Here is a real life example of how the Health Care Center for the Homeless (HCCH) makes an impact on people’s lives:

On a visit to the east side of Orlando, the HOPE Mobile Medical Unit (MMU) encountered a patient with a large growth on his lip. Todd Rock, MPAS, PA-C, immediately suspected it was cancer. Todd placed the patient on medication in case it was an infection and booked an appointment for him in our clinic, the Orange Blossom Family Health Center, so he could biopsy the lesion.

Nancy Martinez and the HOPE Team transported the client from his camp area to the clinic for his appointment. Todd, with the help of MMU Medical Assistants Marissa Cassanova and Alex Castro, was able to biopsy the lesion. The result was invasive squamous cell carcinoma, a form of skin cancer.

After Todd received the results, he contacted Nancy and the HOPE Team and they did a full court press to find the client. After locating him at a camp on the east side, they transported him to Apopka to the MMU so Todd could give him his results in person, get him labs, and secure a referral for treatment. The HOPE Team then transported the client back to the clinic to see the Orange County Secondary Care Referral Specialist, who has an office at HCCH, to process his referral for treatment.

The client has been seen by a specialist and is currently scheduled for surgery.

This is just one example of how the multidisciplinary teamwork at HCCH positively affects people’s lives.

*Story provided by Todd Rock, MPAS, PA-C.*

**Our Numbers** In 2008, the Health Care Center for the Homeless saw 8,579 individual patients, resulting in 26,240 encounters. This represents a 37% increase in the number of patients seen over our 2007 numbers. These encounters generated the following numbers per service offered at the center:

Programs and Events

Mammography Program
The Femmes de Coeur Mammography Program for the Health Care Center for the Homeless has provided over 350 screening mammograms since its inception in 2006. This vital program serves our female patients 40 years of age or older, those with a familial history of breast cancer, or those who have had multiple biopsies. Each screening costs $125 and we have been able to provide 40 per quarter. Due to the generosity of an anonymous donor, we will be able to increase the number of screenings each quarter for a limited time as funds allow.

The Femmes de Coeur provided the initial funds for the program and continues their support to this day. Additional support for this important program has been provided by community partners such as St. Margaret Mary Church in Winter Park, the United Methodist Women’s Group from St. Luke’s Church, and from numerous individual donors throughout Central Florida. We greatly appreciate the community support we receive.

The following gifts to the Mammography Program were made to honor or remember special people:
Ms. Mertha Akins in honor of Ms. Barbara Burns
Dr. and Mrs. Melvin Becker in memory of Mrs. Barbara Becker
Ms. Barbara Burns in honor of her battle with breast cancer
Mrs. James L. Deakins in memory of her late husband, Jim
Mr. and Mrs. Earnest DeLoach in honor of Ms. Terra Williams and Ms. Tommazene Davison
Mr. Alan D. Farrar in memory of his mother, Neva Farrar
Ms. Betty Wells Neel in memory of her late husband, Mr. Joel R. Wells Jr.
Dr. Don Tillery in memory of Debbie Tillery - Beuttner
Mr. William Underwood in honor of Irish Wilson
Dr. Galdino Valvassori in memory of Sandra Valvassori
Ms. Catherine Williamson in honor of Corey Hodges and Ginny Hoffman

Denture Sponsorship
The Health Care Center for the Homeless (HCCH) launched its denture sponsorship program in late 2008 and has seen its first patients complete the process and receive their dentures. In Florida’s service driven economy, a nice smile can have a strong impact on one’s ability to gain employment. HCCH can provide a full set of upper or lower dentures for a patient at a cost of $310 each; partial dentures cost $240 each. This program, started with a grant from Project Dentists Care, helps provide dentures to our homeless patients who have no other means of affording their dentures. Recipients must follow a specific program, taking approximately 12 weeks, which includes oral health care and education. To receive their dentures, patients must adhere to the program guidelines provided, which include keeping scheduled appointments, exhibiting good oral hygiene, and keeping their gums in a healthy state. We have also received funds to support this program from the Edyth Bush Charitable Foundation and numerous local oral health providers.

Central Florida Hospitalist Partners (CFHP) Golf Tournament
The Second Annual CFHP Golf Tournament took place on November 1st, 2008 at the Grand Cypress Golf Club, benefiting the Health Care Center for the Homeless (HCCH). Over $5,300 was raised to help support services at our clinic, the Orange Blossom Family Health Center. CFHP is a group of local physicians who have been caring for patients in the largest and most prestigious hospitals and health care systems in Central Florida since 1999. Their golf tournament is an example of their incredible generosity and just one of the ways they are giving back to the community. We appreciate the efforts of the CFHP on our behalf and look forward to the Third Annual CFHP Golf Tournament, which will take place Saturday October 31st, 2009 at the Rosen Shingle Creek Golf Resort. Please check our website at www.hcch.org or go to www.cfhpgolf.com for updates.

For more information, please contact Terri Betts, Development Associate, at 407-428-5751 Ext 326 or at tbetts@hcch.org.

In Memoriam
“The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have too little.” – Franklin D. Roosevelt

Mr. Walter S. Pharr

The Health Care Center for the Homeless is grateful to them for the lives they touched.
Health Care Center for the Homeless 2008 Annual Campaign Donors

We completed our 2008 Annual Fundraising Campaign, coinciding with our organizations fiscal year, which ran from October 1, 2007 to September 30, 2008. With the generous support of our donors, we are able to provide quality health care services to the homeless and medically indigent populations of our community. We just celebrated our third anniversary in our clinic, the Orange Blossom Family Health Center. We continue to grow and 2009 will involve a planned expansion of our dental clinic capacity. We want to acknowledge and thank all the donors who supported the 2008 Annual Campaign. We could not have done it without you!

2009 Annual Fund

We have an ambitious fundraising goal of $320,930 for 2009. Our fiscal year started October 1, 2008 and will end on September 30, 2009. With $135,204 raised so far, we still have a long way to go.

The funds raised will provide the quality health care services that we are so proud to offer to the homeless and uninsured men, women, and children of our community.

Primary medical and pediatric care, dental and vision services, behavioral health counseling, a residential TB shelter, an on-site pharmacy, two Mobile Medical Units, and an aggressive street outreach program are the cornerstones of the Health Care Center for the Homeless. For people who have dealt with limited access to health care services, we are giving them back their health and hope.

a goal of $320,930
Join us as a partner and be a part of the solution.
Please reach in your hearts and help us!
– We thank you!

I would like to support the Health Care Center for the Homeless and help provide health care services to the homeless and uninsured of our community.

Enclosed is my tax-deductible gift.
