Dear Friends,

Welcome to a new year at the Health Care Center for the Homeless (HCCH). I am proud to have been involved with HCCH since 1998 and as the new Board Chairman, I am excited about what 2011 holds in store for the Health Center.

We have launched our new mobile dental unit, with a focus on providing oral health care for underserved youth at our local schools. This summer we will see the beginning of a planned expansion for our dental clinic, adding four more operatories to our existing six. My special passion at HCCH is the HOPE Team and the outreach they provide. 2011 should see the team touching even more lives and connecting them with vital services at our clinic, the Orange Blossom Family Health Center.

The need for the services provided by the Health Center is greater than ever. In 2010, HCCH served over 8,800 individual patients. Historically, the majority of our patients have been 60% homeless, with the remaining percentage comprised of housed but uninsured residents of Orange County. Recently, we are seeing a more even breakdown with approximately 50% of our patients classified as housed. We have not seen a reduction in the homeless population, so this is most likely a reflection of the increased number of people in Central Florida who have lost jobs and the associated health benefits.

I have traveled the world and seen poverty and hardship in many of the places I have visited. But charity begins at home and we should strive to help those in need within our own community. Please give of your time, talent, and treasure and join with the Health Care Center for the Homeless as we continue to make a difference in the lives of the medically underserved in Central Florida.

Sincerely,

Cliff C. Morris, Jr., PhD
Board Chair
Ida’s Angels

The dictionary defines a volunteer as someone who offers himself or herself for a service - and we know this is without the expectation of financial compensation. The Health Care Center for the Homeless (HCCH) is fortunate to have some truly dedicated volunteers who make a difference in the day to day operation of our clinic; the Orange Blossom Family Health Center. For a non-profit organization, volunteers can make a huge impact - not only by their actual service, but through spreading the word about the good work being done. Our outreach program - the HOPE Team - has multiple volunteers who have committed their heart and soul for many years to helping our homeless clients living in the woods. HCCH has another area that has benefitted greatly from the time and talents of volunteers and will continue to grow as more hands join in... the Patient Assistance Program (PAP).

Rapid HIV Testing Program

The Health Care Center for the Homeless (HCCH) houses a confidential rapid HIV testing program open to anyone from anywhere. There are no geographic, financial requirements to receive this test at our clinic, the Orange Blossom Family Health Center. Using an antibody test administered by finger stick, the test takes approximately 20 minutes to obtain a reactive or non-reactive result. If a reactive result is received, a blood sample is taken and forwarded to the Department of Health for confirmatory testing. It takes two weeks to receive status confirmation from this testing. There is no cost to the patient for the rapid HIV test performed here at our Health Center.

HIV (human immunodeficiency virus) cannot grow on its own, requiring the cells of a living organism to reproduce. It cannot be transmitted through the air, but can be transmitted in different ways including unprotected sex with an infected partner, the sharing of drug needles, or from mother to child through pregnancy, delivery, or breastfeeding. The test we use at HCCH looks for antibodies in the blood that are only present when a person is infected and begins treatment as early as possible, and take measures to protect your current or future sexual partners. Statistics show that the earlier you are able to start antiretroviral treatment, the better.

If you think you may have been exposed to HIV, please be tested for your own peace of mind and to protect those you care about. With early detection you can receive emotional support and advice on the next steps you should take, have your health assessed and begin treatment as early as possible, and take measures to protect your current or future sexual partners. Statistics show that the earlier you are able to start antiretroviral treatment, the better.

To your health,

Bakari E. Burns, MPH, MBA
Chief Executive Officer

Dear Friends

This past December, I attended a memorial service at First Presbyte- rian Church of Orlando for our homeless friends in Central Florida who passed away in 2010. I was saddened by how many of the names I recognized from our Health Center - personally of whom I had the honor of speaking with personally during their time with us. But what struck me even harder were the names I didn't know and how many of them there were. I wanted to know if they had received the care they needed or passed away alone in the woods or on the street? Did they somehow slip through the cracks?

With all the controversy that surrounds health care now, I feel we often miss the central point. Everyone deserves quality health care, whether they live in a penthouse or a tent in the woods. At the Health Care Center for the Homeless, we are providing needed services and care. But I worry about those individuals who may be just out of our reach. Do they know we are here? Do they know that we can help them? Do they know there are people out there who care about them and want to make a difference in their lives?

We must, and will, make every effort at the Health Care Center for the Homeless to connect those in need with the services we can provide. It is in everyone’s best interest that every member of our community be as healthy as possible. We are all in this together.

For more than 18 years, the Health Care Center for the Homeless has been serving Central Florida. I want to thank all of our donors, supporters, and community partners that help make the efforts of the Health Center possible every day. You are making a difference in the lives of our patients and in our community as a whole. I will do everything in my power to make sure we honor your commitment to us every day.

I have a vision of everyone receiving the health care they need and deserve… and I won’t stop pushing our efforts forward until I know we have achieved this goal. No one should be allowed to just slip through the cracks.

To your health,

Bakari E. Burns, MPH, MBA
Chief Executive Officer

Our new Mobile Dental Unit at the Orange Blossom Family Health Center.

Updates

Our mobile dental unit (MDU) arrived in late 2010. Equipped with three dental chairs, this 40 foot unit is state of the art and is expanding our oral health services. A main focus of this new unit will be providing exams and sealant services for underserved youth right on school campuses in the community area. When on site at our clinic, the Orange Blossom Family Health Center, it can be used for patients coming in for dental services as needed and expand our existing capacity. The MDU will also be utilized to provide dental care to Department of Juvenile Justice patients in Brevard and Oceola Counties as well as homeless VA patients in Brevard County.

Health Center Expansion

The Health Care Center for the Homeless (HCCH) has acquired the funding to take the next step in expanding services at our clinic, the Orange Blossom Family Health Center. This expansion will take place in two phases – Phase III and Phase IV. Our original progress began with Phase I, the purchase and renovation of the original building in 2006, Phase II, completed in 2008, increased our medical capacity; expanded our behavioral health department; and added a patient education and counseling center. Phase III will involve a build out of the back of the existing building to allow for a relocation of the administrative offices. Our current administrative offices share a wall with our dental clinic and the floor under this area is already been plumbed for dental. Phase III is planned to start construction in late Spring or early Summer of 2011. Focusing on internal renovations, Phase IV will add five more dental operators where our administrative offices currently reside. Our expansion will also involve adding at least two additional exam rooms in the medical portion of the Health Center. In addition, our pharmacy and the patient education and counseling center will both receive a much needed increase in capacity Phase IV work is expected to begin in October of 2011.

Isla Rodriguez, Patient Assistance Program (PAP) coordinator, and her volunteers process part of one day’s delivery of medications.
Sunday November 7, 2010 was a magical night for the over 300 attendees of the first annual Heart to Heart Gala at the Ballroom at Church Street. The evening ushered in an increased partnership between the Health Care Center for the Homeless (HCCH) and Femmes de Coeur, raising over $50,000 to help provide care for patients at our service delivery site, the Orange Blossom Family Health Center.

For many years, Femmes de Coeur conducted their lovely Sweetheart Affair for the benefit of the patients at the Health Center. In an effort to reach a larger audience and create a signature event for the Health Center, HCCH stepped up their game and members of our Board of Directors and staff became more intimately involved with Femmes de Coeur in the planning and execution of a new venture. The result was the first annual Heart to Heart Gala, which left everyone looking forward to this event for years to come. Proceeds from the Gala will help to provide direct patient services at the Health Center and support our free screening mammography program, formally known as the Femmes de Coeur Mammography Program for the Health Care Center for the Homeless.

Judy Conrad of Femmes de Coeur and Orlando Health’s Rick Schooler of Orlando Health, former HCCH Chairman of the Board, acted as Gala co-chairs and the efforts of many made this event a true success. Our emcee for the evening was Jenelle Taylor, a nationally recognized professional auctioneer and member of Femmes de Coeur. Jenelle worked the crowd during the live auction, which featured coveted items including trips to New York and Las Vegas. The Gala also featured silent auction items, music performed by the Paradise Band, and a delicious dinner generously provided by BRIO Tuscan Grille.

Mr. Bakari Burns, CEO of the Health Care Center for the Homeless, gave an inspirational speech addressing the health care needs of those in our community who are less fortunate. He spoke of the commitment of the Health Care Center for the Homeless to reach out to those in need and connect them with our services and our goal to be the quality medical home that all residents of Central Florida deserve.

HOPE Team volunteer SuSu Gordy spoke about her passion for the Team and the care they provide for so many that have so little, reminding us how blessed we all are to have what we do. The efforts of our HOPE Team were highlighted and the Team members were introduced to the crowd. The HOPE Team (Homeless Outreach Partnership Effort) is the outreach program at HCCH, connecting homeless people living on the streets and in the woods of Central Florida with the services the Health Center can provide.

The audience was also given a view from the inside of what life is like for someone who is homeless by one of our HOPE Team clients, Donna Cullen. It can be hard to imagine living in a homeless camp, and Donna painted a vivid and emotional picture of the three years she spent in the woods of Central Florida. She stressed how vital the efforts of the HOPE Team and the Health Care Center for the Homeless are, stating “they rescued my body and my soul.”

We would like to thank all of our sponsors, donors, and volunteers that made it possible for us to make our very first Heart to Heart Gala such a success. The Board and staff at the Health Care Center for the Homeless would like to extend their special gratitude to the members of Femmes de Coeur for their tireless efforts on behalf of our patients. This special group of ladies is truly making a difference in our community and we are proud to have a continuing partnership with them that has spanned more than a decade.

Planning is already in the works and our 2nd Annual Heart to Heart Gala will take place on Sunday, November 6, 2011 at the Ballroom at Church Street. Please contact Terri Bettis at 407-428-5751 Ext. 326 or at tbettis@fachc.org regarding tickets and sponsorships. The doors open at 5:00pm - please join us for another wonderful evening!

Health Care Center for the Homeless

Our Mission:
“To provide quality health care services that improve the lives of the homeless and medically indigent people of our community.”

Our History – The Health Care Center for the Homeless (HCCH) is a 501(c)(3) non-profit organization founded in 1993 by Dr. Rick Badley, a volunteer physician who saw the need to provide quality health care services to the homeless population in Orlando, Florida. HCCH initially shared a space at the Coalition for the Homeless, operating one or two nights a week through the efforts of a group of volunteer providers. In 1995, we received a grant from the Robert Wood Johnson Foundation to provide primary health care services to the homeless residents of Orange, Osceola, and Seminole Counties in Central Florida. In 2002, HCCH was granted funding from the Health Resources and Services Administration (HRSA) Bureau of Primary Health Care to increase the Health Center’s capacity and to financially support the provision of primary and preventative health care services for the homeless.

For many years, HCCH operated primary medical care and oral health care services out of three separate locations: In 2006, we opened our clinic building, the Orange Blossom Family Health Center, located just a few blocks west of downtown Orlando. With our new Health Center as the delivery site for all of our services, we were able to double our capacity and expand our services to include housing, but uninsured residents of Orlando. HCCH is the sole provider of health care services for the homeless population in the tri-county area and takes a multi-disciplinary approach to delivering quality health care services. This approach integrates aggressive street outreach with integrated systems of primary medical care, oral health services, behavioral health and substance abuse counseling, case management, and advocacy.

In 2007, HCCH received a $1.1 million grant from the Health Resources and Services Administration (HRSA), Bureau of Primary Health Care. This funding allowed us to increase our medical capacity and to start our mobile health services program. In 2008 we completed the construction of our Phase II building, which added four new medical exam rooms, medical and dental behavioral health offices, and a patient education and counseling center. This construction was funded through a Community Development Block Grant (CDBG) from the City of Orlando and private support. In 2011, we began our Phase III construction (CDBG) from the City of Orlando and private support. In 2011, we began our Phase III construction and Phase IV renovations, which will focus on the relocation of our administrative suite and the expansion of our dental services.

Our Services
Primary and Preventative Medical Care – Primary medical care is provided by a team of physicians, nurse practitioners, physician assistants, registered nurses, medical assistants, and student interns. Through the Health Disparities Collaborative, a program designed to reduce disparities in health outcomes for poor minority and other underserved people, we use a Chronic Care Model. This is designed to empower the patient to take charge in managing their own health, especially chronic diseases. As we provide primary care, we have an Orange County Referral Specialist who identifies patients who qualify with referrals for secondary care. Our goal is to create a “medical home” for our patients in an effort to prevent the unnecessary use of the hospital emergency rooms for primary care needs. HCCH also has a free screening program that provides this service for our female patients through a mobile unit that comes to our Health Center.

Pharmacy Services – HCCH operates an on-site pharmacy to serve our patients seen by a provider within the Health Center, providing a convenient setting. HCCH also maintains a Patient Assistance Program (PAP) which helps our patients who qualify obtain free medications through the major pharmaceutical companies. Our PAP coordinator currently works with over 2000 patients and assists them in obtaining an initial three month supply of their medications and help to manage their refills as needed. In 2010, this program helped our patients receive over $3,000,000 in prescription medications. Without this program, these costs would have been absorbed by either HCCH or the patient with the possibility the patient may not have received a needed medication.

Vision Services – Our Vision Center is the only source of free ophthalmic services for homeless individuals living in Central Florida. While we provide glasses for the purpose of vision correction, we also screen our patients for vision related issues that may result from diabetes and other chronic illnesses. Education is also provided on the importance of addressing eye health issues. HCCH provides the vision needs of our patients through partnerships with Lions Club International and LensCrafters. The Lions Club collects used glasses, classifies them, and stores them in their warehouse in Ocoee. Once a patient screened for the particular strength they need, the Lions Club provides the glasses. If they are unable to fulfill a specific need, LensCrafters will then supply the necessary eye glasses at no charge.

Residential TB Shelter – HCCH maintains a residential shelter for homeless individuals suffering from infectious tuberculosis. The only one of its kind in Central Florida, this 10 bed shelter has been in operation since 1995 and provides on-site supervised therapy, ensures patient safety, and limits an infected individual’s contact with the community as a whole. Full recovery usually requires an average stay of six months and patients are monitored for two years. We began our Phase III construction and Phase IV renovations, which will focus on the relocation of our administrative suite and the expansion of our dental services.

Oral Health Services – Our dental clinic is the only continuous source of oral health services for the homeless in the tri-county area. Dental services at HCCH are provided by a team of dentists, hygienists, dental assistants, and dental students. Our services include providing dental exams, cleaning, cavity fillings, root-canal therapy, extractions, cleaning, and nutritional needs are addressed by HCCH and patients are monitored through our Health Center. Among the many services the HCCH provides, we offer vision services for homeless individuals throughout the tri-county area, working with our clients to assess their needs and provide them with the necessary care.

Behavioral Health and Substance Abuse Counseling – When seeking mental health services, our homeless and/or uninsured patients face similar barriers as when they try to access primary care services. When a patient is seen at our Health Center, they are assessed for multiple needs, including behavioral health or substance abuse issues. Our behavioral health team consists of two licensed mental health counselors and a psychiatric nurse practitioner who provide mental health and substance abuse counseling, individual therapy, and referrals to detoxification and crisis centers. Our psychiatric nurse practitioner prescribes and manages medication on an as-needed basis for our homeless clients with chronic behavioral health issues. Our clinic is also an approved site for graduate level mental health interns and students. Through an individualized treatment plan, our behavioral health team is empowering their clients to make better life choices.

The HOPE Team (Homeless Outreach Partnership Effort) – Outreach at HCCH is provided by a team of staff and volunteers working where the homeless live – on the streets and in the woods. Known as the HOPE Team (Homeless Outreach Partnership Effort), their main goal is to connect clients in the camps with the health services that HCCH can provide for them. The Team is initially building a rapport with the clients and gains their trust, eventually allowing the Team to introduce them to services available through our Health Center. Among the many services the HOPE Team provides, they offer transportation for medical appointments, obtaining identification cards and birth certificates, referrals for treatment programs and transitional housing; and assistance in accessing mainstream benefits. In 2010, HCCH added a Registered Nurse to the HOPE Team, allowing for more medical needs to be addressed by the field.

Mobile Health Services – HCCH launched its first mobile medical unit in 2008, building on the success of our outreach team. Known as the HOPE Mobile Medical Unit, this 37 foot “clinic on wheels” was funded through a federal grant and is staffed by an Advanced Registered Nurse Practitioner and two Medical Assistants. This unit provides primary medical care services for homeless individuals throughout the tri-county area, visiting over a dozen of our community partners each month who work with the homeless. In 2009, HCCH received a new mobile unit through a generous in-kind gift from the Senior Resource Alliance. This unit will be brought up to full staffing in 2011 and used more regularly out in the community. Through funding from the American Re-Investment and Recovery Act (ARRA), HCCH acquired a mobile dental unit in late 2010. This unit will partner with local schools to help provide oral health care to underserved children in the community in addition to other collaborations.

Emergency Room Diversion Program – One of our primary goals at the Health Care Center for the Homeless (HCCH) is to reduce the improper use of the local emergency rooms for non-emergent care. While some health incidents require this kind of care, many of our homeless clients use the emergency rooms for primary care needs. HCCH can address these needs and provide a medical home for our patients. We employ a Health Navigator in the emergency room at Orlando Health who routes homeless individuals to our Health Center. Here they can receive consistent medical care and education on how to manage their own health. In 2009, 466 of the patients our Health Navigator encountered became established patients at our Health Center. In 2010, 524 homeless individuals became regular patients at the Orange Blossom Family Health Center after contact with our Health Navigator.

Mammography Program

The Health Care Center for the Homeless (HCCH) provides free screening mammograms for our female patients over the age of forty through our Femmes de Coeur Mammography Program for the Health Care Center for the Homeless. Breast cancer occurrence increases with age and the program was founded in 2006 to help address this issue at our Health Center.

The program began as a partnership with Femmes de Coeur, a local women’s philanthropic group. The ladies of Femmes de Coeur provided the start-up funds for the screenings and continue to provide their support through our Heart to Heart Gala collaboration and private support from individual members. As of January of 2011, over 800 women have received free mammograms through this program.

When a patient is initially seen by a provider at the Orange Blossom Family Health Center, they are assessed for multiple needs that we can address. A female patient is “prescribed” a mammogram if she is over the age of forty, has never received a screening mammogram, has a familial history of breast cancer, has had multiple biopsies, or has had multiple surgeries due to the constant pain, has returned to normal. She feels great, working two jobs and facing her days without the relentless pain.

Facing Better Days

Most of us have the benefit of health insurance. While facing an illness or injury is still daunting, we have a support system. But imagine you have no health insurance, something happens, and you face every day in constant pain.

Lisa is 41 and has lived in Orlando for over 20 years. Working since she was 16 years old, she mainly held jobs that kept her on her feet most of the day. A stylist for the past ten years, she has been without health insurance for over seven years and a patient at the Orange Blossom Family Health Center since it opened in 2006.

Five years ago, Lisa began feeling an aching pain in her left hip. While the pain was present every day, it was tolerable and she assumed she had strained something or it was a result of constantly standing at work. The minor pain continued for over two years and then worsened. Her hip began to hurt around the clock and the pain often extended to her knee or all the way down her leg. She was prescribed pain medication as her provider considered possible causes, with arthritis being a strong candidate.

When Chianta Lindsey, DNP, ARNP became Lisa’s provider, she assessed the situation and referred Lisa to an orthopedic doctor through the Orange County Referral Program. An MRI found the cause of Lisa’s pain—avascular necrosis of the left hip. The blood supply had been cut off and Lisa was basically walking around with dead bone. This normally occurs in someone much older, so it had not been strongly considered initially. If not detected, it could have resulted in the amputation of her leg. Instead, she faced a hip replacement.

Since Lisa qualified for the Orange County Referral Program, her medical care was covered through this service and her only out of pocket expense was for her medication. Within a month of her diagnosis, she received her hip replacement and a month of rehabilitation followed. Lisa now has full range of motion in her hip with only occasional minor pain. Her blood pressure, elevated before the surgery due to the constant pain, has returned to normal. She feels great, working two jobs and facing her days without the relentless pain.

Lisa credits the Health Center with saving her leg and considers it a “blessing.” Without insurance or money, she felt she had few options and was a lost cause. Lisa hopes to someday become a regular donor herself and help others in need to experience the care she has received at the Orange Blossom Family Health Center.

### Golfing for Good
On November 13, 2010, the Central Florida Hospitalist Partners (CFHP) held its fourth annual golf tournament. Taking place at the Shingle Creek Golf Resort, it was a beautiful Saturday in the sun with a little friendly competition thrown in.

This is the third year CFHP has conducted this event for the benefit of the Health Care Center for the Homeless and 2010 brought their largest turnout to date. CFHP raised $10,662 to help provide services to patients at our clinic, the Orange Blossom Family Health Center. It was a great day for golf and over 120 players enjoyed one of the finest courses in Central Florida. Followed by a tasty buffet lunch, awards were handed out and items were raffled off, including an iPad.

CFHP is a group of local physicians who have been caring for patients in the largest and most prestigious hospitals and healthcare systems in Central Florida since 1999. Many of the patients they see in the course of their day are the same individuals who call our Health Center their medical home. The CFHP Golf Tournament is just one example of their incredible generosity. We would like to say a special thank you to Dr. Darin Wolfe, President of the Central Florida Hospitalist Partners; Ms. Anne Wagner, Executive Director; and Ms. Jennifer Gorman, event coordinator for CFHP for their incredible work and hard work.

The 5th Annual CFHP Golf Tournament will take place in the Fall of 2011. Please go to cfpipal.org for additional information and updates.
Our fundraising goal for our 2011 Fiscal Year is $243,200. Our fiscal year started October 1st and will end on September 30th. With over $160,000 raised so far, we are more than half way there. Thank you to all who support our mission here at the Health Care Center for the Homeless. The funds raised through our annual campaign provide the quality health care services we are so proud to offer to the homeless and uninsured men, women, and children of our community.

Primary and preventive medical care, dental and vision services, behavioral health and substance abuse counseling, a residential TB shelter, an on-site pharmacy, mobile health services, and aggressive street outreach are the foundation of the Health Care Center for the Homeless. For people who have dealt with limited access to health care services, we are giving them back their health and the hope for a better future.

a goal of $243,200
We hope you will join us as a partner and be a part of the solution.

Please reach in your hearts and help us!
– We thank you!

I would like to support the Health Care Center for the Homeless and help provide health care services to the homeless and uninsured of our community.

Enclosed is my tax-deductible gift.
